

## **Acoustics opportunities Birmingham, London, Manchester Competitive salary + benefits**

---

The Hoare Lea Acoustics group is expanding due to a healthy forward pipeline of work.

The acoustic group within Hoare Lea is one of the UK's largest and longest established acoustic consultancies, with over 35 acoustic engineers and a history spanning back over 40 years. With a well-deserved reputation for innovation, we work with leading firms of architects, developers and contractors, on some of the world's most prestigious projects. Our portfolio of clients is as diverse as it is impressive, and includes projects for clients such as Deloitte, Mercedes, the Home Office, Manchester Airport, Warner Bros, Oxford University, Scottish Power, DEFRA, BERR and Manchester City Football Club. From wind farms to television studios, our work encompasses architectural acoustics, environmental noise and vibration surveys, expert witness representation and planning inquiries, as well as Government funded research.

This is an exciting time to join Hoare Lea as we are focused on growth, both in the UK and overseas. We are large enough to provide stability and opportunity, and small enough to recognise our people as individuals; this has led to a culture of flexibility, individualism and organic growth.
