

We're happy to make a noise about this opportunity!

SENIOR ACOUSTICS CONSULTANT

Royal Haskoning is an independent Engineering and Environmental Consultancy with 3,900 staff operating worldwide. We undertake a wide range of high profile, technically demanding projects and have developed a reputation for technical excellence, innovation and project delivery.

This is a unique opportunity for the right individual to join and help to grow a specialised team providing noise and vibration services for existing and new business opportunities. The role encompasses all aspects of environmental noise assessment from development control, industrial regulation and EIA, particularly in the renewables sector, where our consultancy is prominent.

You will be based at our Rochdale office, integrating with the wider business on a daily basis. UK travel is integral to this role and there will be opportunities for international travel.

Have you got what it takes?

- Are you enthusiastic, conscientious and talented with excellent communication skills;
- A science degree and ideally a post graduate qualification in Acoustics;
- Experienced in noise monitoring surveys, environmental noise assessment, EIA, PPG24, BS4142 and Environmental Permitting;
- Full IoA membership;
- Are commercially aware with good report writing, project management and resource management skills?

We offer a competitive salary plus a wide range of benefits.
