

Acoustics Engineer/Senior Acoustics Engineer.

London.

About the role

We are looking for a talented Acoustic Engineer or Senior Acoustic Engineer with a focus on building acoustics to join our London team.

This is an excellent opportunity for someone looking to take the next step in their career, with increasing responsibility for project delivery, client engagement and design leadership.

You'll become part of an award-winning, collaborative group working across the UK on a wide range of projects, from healthcare and hotels to music venues, modern workplaces and other complex, design-led environments.

As part of the team, your day-to-day work will be varied and engaging. Key responsibilities will include:

- Collaborating within multi-disciplinary project teams to develop innovative design solutions
- Leading small to medium-sized projects from inception through to completion and handover, with support from senior colleagues as needed.
- Undertaking acoustic surveys and measurements in a wide range of environments using the best available tools and techniques
- Carry out modelling, calculations and analysis using both in-house developed programs and commercial software to inform design decisions
- Liaising with clients, consultants and wider project teams, contributing confidently to project discussions and design development
- Producing clear, practical advice through written reports, sketches, presentations, audio demos and interactive media
- Contributing to a culture of creativity and innovation, helping to improve acoustic quality across projects

About you

To be successful in this role, you will need:

- A solid foundation in acoustic engineering, with experience delivering building acoustic projects across design stages.
- A desire to develop your profile, take on greater responsibility, and grow into a more senior role.
- A bachelor's or master's degree related to Acoustic Engineering
- A degree in another discipline will also be considered if complemented by an IOA Diploma
- Excellent communication, analytical and organisational skills
- The ability to work effectively both independently and as part of a team
- A friendly, proactive and positive approach
- A flexible, enthusiastic mindset and a genuine interest in delivering high-quality design solutions

Why join us?

- Work on high-profile and technically challenging projects across multiple sectors
- Be part of a supportive and collaborative team
- Develop your skills with exposure to both technical and design-led work
- Help shape healthier, more valuable and more acoustically successful buildings
- Opportunity to take on increasing responsibility and grow your career in a business that values both excellence and individuality
- Optional 9-day fortnight working pattern

How to apply

To apply simply complete a CV profile and submit your application to jessicamartin@hoarelea.com.
