

SENIOR ACOUSTICS CONSULTANT

Join Our Acoustics Team

London - Southampton • Hybrid working

Trium Environmental provides expert acoustics and environmental advice across residential, education, commercial and infrastructure projects. Our acoustics team provides practical, technically robust solutions in environmental noise, vibration and building acoustics, supporting projects from early design through to planning and delivery.

ABOUT YOU

Essential Requirements

- Degree in Acoustics or a related discipline
- Minimum 4 year's experience providing environmental and/or building acoustics consultancy
- Strong written and verbal communication skills
- Highly organised, analytical, and eager to learn and develop
- Confident working both independently and collaboratively as part of a team

The Ideal Candidate

- Can organise and direct others in the completion of surveys and site inspections
- Comfortable providing clear and robust advice at every stage of a project
- Can undertake assessments and prepare technical reports with minimal supervision
- A working knowledge of relevant legislation, regulations, standards and industry guidance
- Is familiar with CadnaA, Insul and other industry standard software

WHAT WE OFFER

- Competitive salary package aligned with experience
- Professional development support
- Opportunity to work on large, interesting and prestige projects where acoustics is a key component
- Close working with experienced acoustics consultants
- Be part of a growing team with unrestricted potential career progression opportunities
