

Job Overview

HA Acoustics are currently recruiting for a Principal / Senior Acoustic Consultant to join the team.

The successful candidate will join an established team of acousticians primarily providing noise impact assessments to a wide variety of clients, as well as acoustic design, continuous noise and vibration monitoring, noise modelling, noise at work and UKAS accredited sound insulation testing. Working nationwide, though predominantly across East Anglia and London.

The successful candidate will lead small to medium, or medium to large sized noise projects (dependent on role) and help to support the existing acoustic team. The role will be based in our Sawbridgeworth office, with the potential to undertake an element of remote working. Experience in client relationship, business development of a lead area, management, training and mentoring is highly desirable. This varied role will enhance your skills and continue to develop and shape your career in acoustics, affording good opportunities with a growing, dynamic consultancy.

Key Responsibilities

It is expected that the successful candidate will contribute to the growth and development of the team, whilst undertaking technical project work. Anticipated core duties include:

- Noise and Vibration surveys, site attendance, report writing and technical review work
- Managing projects and advising clients on developments
- Understanding and applying relevant UK noise policy, regulations and standards.
- Developing client relationships, preparation and checking of fee proposals.
- Support the development, training, mentoring and management of the acoustics team
- Liaising with clients, local authority officers and stakeholders;
- Experience in vibration assessments, writing ES chapters, undertaking BREEAM Pol 05 and Hea 05 surveys, along with long-term construction noise, dust and vibration monitoring.
- Using experience and innovation to improve working practices.
- Travel and surveys may be required outside of working hours.

Skills and Qualifications

Essential

- Highly experienced in the acoustic consultancy industry.
- Qualified to degree level (or equivalent) in acoustics or a related discipline or hold the IOA diploma in acoustics and noise control
- Member of the Institute of Acoustics (Principal post) / Associate Member of the IOA or higher (Senior)
- Relevant consultancy experience post qualification, documented technical project work
- 5 years, or more acoustic experience (Principal Post) / 4 years, or more acoustic experience (Senior)
- Driving licence
