

## ACOUSTIC CONSULTANT

### HA ACOUSTICS - SAWBRIDGEWORTH

#### Job Overview

- HA Acoustics are currently recruiting for an Acoustic Consultant to join their team.
  - Other grades from Technician to Principal considered.

The successful candidate will join an established team of acousticians providing noise impact assessments to a wide variety of clients, as well as acoustic design, continuous noise and vibration monitoring, noise modelling, noise at work and UKAS accredited sound insulation testing. Working nationwide, though predominantly across East Anglia and London.

The successful candidate will hold a professional membership of the Institute of Acoustics and have a minimum 1-2 years experience as an acoustic consultant, having worked on a variety of small to medium sized noise projects. Supporting the acoustics team, a positive, hardworking attitude is essential, together with good communication, analytical data processing and report writing skills. The role will be based in our Sawbridgeworth office, with the potential to undertake an element of remote working. The ability to evidence past client relationships, business development of a lead area, training and mentoring is highly desirable. This varied role will enhance your skills and continue to develop and shape your career in acoustics, affording good opportunities with a growing, dynamic, friendly consultancy.

#### Key Responsibilities

It is expected that the successful candidate will contribute to the growth and development of the team, whilst undertaking technical project work. Anticipated core duties include:

- Noise Impact Assessments (BS4142, BS8233, BS5228)
- Noise and Vibration surveys, site attendance, report writing and technical review work
- Noise at Work Assessments
- Managing projects and advising clients on developments
- Understanding and applying relevant UK noise policy, regulations and standards.
- Developing client relationships, preparation and checking of fee proposals.
- Support the development, training, mentoring and management of the acoustics team
- Liaising with clients, local authority officers and stakeholders;
- Noise modelling (e.g. Soundplan, IMMI, Insul)
- Experience in vibration assessments, writing ES chapters, undertaking BREEAM Pol 05 and Hea 05 surveys, along with long-term construction noise, dust and vibration monitoring.
- Using experience and innovation to improve working practices.
- Travel and surveys may be required outside of working hours.

#### Skills and Qualifications

##### Essential

- Experienced in the acoustic consultancy industry.
- Qualified to degree level (or equivalent) in acoustics or a related discipline or hold the IOA diploma in acoustics and noise control
- Associate Member of the Institute of Acoustics
- Relevant consultancy experience post qualification, documented technical project work
- Relevant acoustic experience
- Driving licence
