

Analyst – Environmental Research and Consultancy Department

Salary £26,752 to £35,000 dependant on experience | Permanent
Gatwick based with flexible working options

We have an exciting new opportunity for an Analyst to join our International Group division within the UK Civil Aviation Authority (CAA).

The role

Our Environmental Research and Consultancy Department is the CAA's environmental centre of excellence. Our primary focus is to support the UK Department for Transport, providing technical advice on all aspects of aviation noise, including airport noise modelling and monitoring, noise policy development, and research about the health effects of aircraft noise. We also support industry, community and other government stakeholders in all matters relating to aircraft noise, and increasingly in aviation emissions.

The role will involve analysing aircraft noise, greenhouse gas emissions and other environmental data to provide information for use by government clients in the development of public policy relating to the environmental impacts of aviation, and by commercial clients for the purposes of aviation noise and wider environmental management.

About you

We are looking for someone with either three or more years' relevant professional experience working in the field of environmental acoustics, or at least three years' relevant professional experience working in technical analysis of aviation environmental impacts and mitigation.

To apply, please visit: <https://careers.caa.co.uk/>

Closing Date: Monday 4th April 2022

Interview Date: W/C Monday 11th April 2022

We reserve the right to close this vacancy early if we receive sufficient applications for the role. Therefore, if you are interested, please submit your application as early as possible. All interviews will be conducted online by video conference using Microsoft Teams.
