

Hann Tucker Associates

Consultants in Acoustics Noise & Vibration

With a history spanning over 50 years, Hann Tucker is one of the original names in acoustic consultancy and one of the largest independent acoustic consultancies in the UK. We work with leading property developers and world-renowned architects designing exceptional, award-winning buildings.

Our office in Woking, Surrey, is seeking an enthusiastic, reliable **Acoustic Technician** to assist our experienced consultancy team.

This is an opportunity to be involved in some extraordinary projects. Projects that will see the creation of entirely new city neighbourhoods, skyscrapers, state of the art buildings for world-leading research, TV & music studios, conference halls, performance venues, multi-screen cinemas, luxury hotels, and more.

With help from our team, you would quickly develop your skills through hands-on project work primarily involving site surveys, building acoustic testing and environmental monitoring. Subject to your development, there could be future opportunity to assist with building design assessments (incl. 3D building/room acoustic modelling) and technical report writing, which could lead to a consultancy role.

Successful candidates are likely to require:

- 3 A-levels at grade C or above (including Maths) OR a BTEC National Diploma or Level 3 equivalent (including Maths)
- GCSE passes in five subjects (grade C or above), including English Language and Maths
- Experience of (or interest in) working with sound
- Enthusiasm about the built environment, engineering, environmental and sustainability issues
- A full driving licence is preferable.

Our remuneration package is competitive, and we are confident you would find the work varied, rewarding and fun.

To apply, email your CV to Mary | m.usherwood@hanttucker.co.uk
