

We have **three amazing opportunities** for aspiring acousticians to join our ANC award winning acoustics team.

**Senior Architectural Acoustician - London**

**Senior Environmental Acoustician - UK**

**Principal/Associate Acoustician - Birmingham**

**“Working in the WSP Acoustics team for the last six years has allowed me to realise my goals and ambitions. The team are really friendly and helpful, supporting me towards achieving chartership as well as my ongoing professional and personal development.”**

**- WSP Senior Acoustics Consultant, IEng MIOA**

**About the Roles:**

We are looking for aspiring acousticians who want to work on the UK’s most exciting new projects in a friendly team of engineers.

From skyscrapers to primary schools for children with learning difficulties, or from major infrastructure projects to assessing large mixed-use developments – we work on a wide range of projects in multiple sectors. You will have the opportunity to manage projects including ownership of the finances and client care, and work collaboratively with others in the WSP acoustics team to deliver the technical work.

**A typical week would include:**

- Working on architectural/environmental acoustics projects for a wide range of schemes
- Liaising with clients and stakeholders
- Attending design team meetings
- Undertaking site surveys and writing technical reports
- Contributing towards technical advancements in the team.

**About us:**

The WSP acoustics team is amongst the largest and most well respected in the UK. We are regular recipients of industry awards and our leading experts regularly present at conferences and produce cutting edge research papers and guidance documents. We are proud of our wide-ranging knowledge and expertise covering environmental acoustics, building acoustics and complex vibration assessments.

*The WSP Acoustics team are the winners of the 2020 ANC Award for Vibration Control and Prediction. The judges praised the creative and innovative approach to using Findwave to give the client the information they needed to proceed with a time critical project, with good collaboration demonstrated throughout.*

Equally important to us is nurturing an inclusive team with a true family-feel, which is supportive of your technical, personal and professional development. Being an integral part of a multi-disciplinary and global organisation, provides excellent opportunities for you to flourish within a team of motivated individuals. This includes investing in your training needs, mentoring and support for those working towards chartership and opportunities for global secondments.
