

SRL's Acoustic Consultancy team is expanding.

SRL is one of the largest independent acoustic consultancies in the UK. Most of our work is associated with exciting projects in the construction industry - either designing buildings or managing the impact of construction sites. We get involved with just about any type of building and infrastructure project you can think of, plus some you probably can't! We are becoming increasingly busy thanks to our strong client relationships, market understanding and ability to recognise new opportunities and we are keen to recruit more high-quality Consultants to expand our team. Our acoustic consultancy has been established for over half a century and we are proud to have contributed to a long and varied list of major projects across the UK and the rest of the world.

Our team bring a wealth of experience to every project, whether it be planning, performance prediction, design, inspection, troubleshooting, measurement or commissioning. We have developed an industry-leading approach to acoustic consultancy and provide independent support on anything where noise or vibration is an issue using the latest measurement equipment and computer modelling programs.

Graduate Technical Trainee

SRL are looking for a Technical Trainee to join the growing Acoustic Consultancy team. The successful candidate will be fully trained as they move through our comprehensive induction programme to progress through the various grades from Technical Trainee through to Senior and Principal Consultant. The role requires the successful candidate to collect reliable and meaningful data from noise and vibration surveys at proposed building developments and sound insulation testing on construction sites, and analyse the collected data and report the results to our clients. You will be trained to use state-of-the-art acoustic modelling techniques and will be given the opportunity to contribute to the acoustic design of some of the UK's most prestigious construction projects. This is varied role with a mixture of site based, office or home-based work – you won't be bored! This is an excellent opportunity for a graduate or someone who wants a change in career.

Experienced Acoustics Consultant

SRL are looking for an experienced Consultant to join the growing Building Acoustics team. This exciting opportunity offers a key role in shaping SRL's future. The successful candidate will help SRL to maintain its technical excellence whilst bringing experience that will increase our capability. There is the opportunity to lead project teams and be responsible for our largest and most prestigious contracts. We are looking for technically capable people with experience of managing large projects. This is an excellent opportunity for someone who is flexible, enthusiastic and practical. We expect all our seniors to be able to engage with clients and colleagues at all levels.

Generous benefits package including:

In addition to our attractive working environment, we offer:

- A comprehensive remuneration package
- Electric Car scheme

- “Cycle to work” scheme
- Share option scheme (after 3 years with the company)
- Westfield Health membership
- Pension (up to 10% matched contribution)
- Gym Membership contribution
- 27.5 days holiday + bank holidays
- Christmas shut down
- Business travel insurance
- Death in service payment

Please contact Nicola Manning on 01787 247575 or send your CV and covering letter to nmanning@srltsl.com stating which position you are interested in.
