

SCOTTISH ENVIRONMENT PROTECTION AGENCY

Scientist (Chemistry)

Looking for your next challenge? A great opportunity has arisen at the Scottish Environment Protection Agency (SEPA) who are looking to hire an environmental scientist with noise assessment expertise to work in their field team. The initial focus of the role will involve undertaking noise assessments related to SEPA-regulated industrial sites and audits of monitoring and reports of other noise assessors. The main assessments undertaken include BS4142, low frequency noise and tonal noise investigations. The role also covers aspects of ambient air monitoring, water quality monitoring and carrying out investigations into compliance in the waste sector. The ideal candidate will have experience in leading, planning, delivering, interpreting large datasets and reporting environmental investigations with experience and knowledge of environmental noise regulations and guidance. An IOA Certificate of Competence in Environmental Noise Measurements is highly desirable.
