

# Principal Acoustic Consultant

## About Us:

We've been around for more than 135 years. We drive inclusive sustainable development with our clients in areas that we master and can actively influence. Our people are keen to positively change the future and leave a legacy. Our networked organisation of smart entrepreneurs connects the best and brightest people in the world. Together we have an ambition to run a financially healthy business by putting our collective intelligence into practice with clients and partners. We are commercial savvy engineers, project managers and consultants who design smart cities, airports, ports, buildings and more. We reinvent industries; co-create clean energy and fresh water by using smart data and digitizing information flows and models. More and more, we connect the digital with the real world in an accelerating pace. Working together with our clients and partners, we use data and algorithms to translate insights into foresights. We help our clients in their digital transformation and we support our clients' business with better and faster execution of their ambitions. We enhance society together!

## The Role:

We have an opportunity for a Principal Acoustic Consultant to join our Environmental team who can proactively lead our in-house technical work, ensuring that it is of the quality expected and required by our internal and external clients. The role can be based in Newcastle, Leeds, Manchester or Peterborough.

We have an extensive portfolio of work and the role will involve management/direction and acquisition of projects of various sizes including energy (including nuclear and renewables), industry, port and coastal developments, flood and coastal defence, and more general development schemes.

Royal HaskoningDHV is a recognised Sector leader in the field of offshore wind consenting and offers the opportunity to work on multiple Nationally Significant Infrastructure Projects.

**This position would be suitable for someone looking for part time work, a minimum of 22.5 hours per week required.**

Main work areas will be:-

- Practice leadership, coordination and development
- Environmental consultancy
- Environmental Impact Assessment (EIA) and environmental appraisal
- Supporting the delivery of developments and projects within the UK Consent and Planning system
- Environmental investigations, monitoring, data analysis and assessment
- General support to senior technical specialists and the wider team

## Required Skills and Experience

- Bachelors (essential) and Masters degree (desirable) in a core science, environmental science, or related discipline
- Demonstrable experience of noise monitoring surveys, environmental noise assessment, EIA, ProPG, BS4142 and IPPC permitting
- Full IoA membership
- Experienced in the use of noise modelling software
- Solid understanding of legislative and other drivers, including industry best practice and the EIA process.
- Excellent written and verbal communication, organisational, analytical and time management skills
- Substantial experience in consultancy
- Strong network across relevant industry sectors, including both clients and relevant regulators
- Willingness to travel, including possibly to international destinations

## Benefits:

We offer a competitive salary plus a range of benefits including a contributory pension, discretionary company bonus, Health and Dental care, Life Insurance, 25 days holiday and a flexible working policy. Our contributory pension scheme has been awarded the Pension Quality Mark, the highest standard of excellence available for UK company pension schemes.
