

Recruitment Solutions: **Acoustics | Noise | Vibration**

Since 2004, MSA has provided a bespoke recruitment service to clients and candidates working in Acoustics, Noise and Vibration. As a niche recruiter in this sector, we have developed a comprehensive understanding of the industry enabling us to provide candidates with a wealth of information and a consultative approach to securing your next career move. We are currently recruiting for the positions listed below – and for a full list of our current vacancies, please visit: [www.msacareers.co.uk/vacancies](http://www.msacareers.co.uk/vacancies)

**Senior Acoustic Consultant (Renewables) | Bristol | £40,000 to 50,000**

This is a brilliant opportunity to work for a growing independent firm of acoustic consultants, who work on a wide range of projects including:

- Solar & Wind farms
- Battery Storage facilities
- Large residential schemes
- Commercial schemes

Due to ongoing demand for their services, they are looking to appoint a Senior Acoustic Consultant to manage projects and work with colleagues at their offices in Bristol.

Applicants should have the following -:

- 5+ years experience in Acoustic consultancy
- Highly proficient in the use of CADNA modelling software
- Experienced of managing Environmental & Industrial noise projects
- Ideally some experience of working on renewables / energy schemes (Solar / BESS)
- MIOA membership & Full UK driving licence

**Acoustic Consultant (Graduate) | Leeds / Sheffield | up to £26,000 + company vehicle**

Are you a recent Leeds Met Graduate in Acoustics / Music Technology? Do you have excellent Maths & Physics skills with the aptitude to learn and develop into an Acoustic Consultant? An excellent career opportunity has arisen for a bright and hard working Graduate to work within an independent Acoustic consultancy in South Yorkshire.

You will possess good writing and communication skills and hold a full UK driving licence.

Applications will also be welcome from candidates with 1+ years experience in the field of Acoustics – salary flexible in line with experience.

**Acoustic Analyst | Central Scotland | up to £40,000 + Bonus up to 20%**

Our client is at the forefront of renewable energy technologies operating across the globe. They are seeking to recruit an Acoustic Analyst to undertake early phase and simple acoustic assessments for wind, solar, energy storage and green hydrogen technologies.

Suitable applicants will be familiar with acoustic analysis methodologies and renewable energy markets, and have a good understanding of acoustic analysis best practice and current UK regulations.

This role will suit candidates who excel at Maths & Physics and have good software development / coding skills using tools such as Python. You will have a degree in Acoustics, Engineering, Physics, Maths (or a related discipline).
