Senior Acoustic Consultant | Dundee | to £40,000 + Bonus + Car Allowance

Our client is a long-established independent Architectural practice with a respected in-house Acoustic consultancy arm. Due to continued growth, they have a unique opening for an experienced Acoustician to lead a small team of Acoustic Engineers based in their Dundee office. They have a loyal client list consisting of Universities, commercial & residential developers and contractors. The brief for this role for the Principal Acoustician to lead Acoustics with these clients and further develop business across Scotland. The focus will naturally be within Building & Architectural Acoustics – but the business also handles enquiries relating to Environmental Noise & Vibration assessments / industrial noise, so a good all-rounder would be ideal and someone with excellent CADNA modelling skills. The role comes with a competitive basic salary, a company car / car allowance, and results-based bonus opportunity. This is a unique challenge for the right individual to help shape the business for many years to come.

Acoustics specialist | Nottingham | up to £40,000 package

This role would suit an ambitious Acoustician who is keen to grow their own team and help develop the Acoustics discipline within this independent landscape & planning consultancy. Building on what is already a significant existing workload, you will be involved in the assessment of noise for various types of projects, including residential, commercial and educational development. You will undertake noise monitoring, modelling and assessment works, liaising with clients, colleagues, local authorities and transport consultants. As the successful applicant you will have 2-6 years' experience working in the field of acoustics. You will need experience of noise monitoring and assessment procedures and be familiar and competent in the application of all regulations relating to residential and commercial development. You will possess excellent report writing skills and have experience of noise modelling using SoundPLAN or CadnaA. You will have excellent organisational and numerical skills.

Senior / Consultant Acoustic Engineers | London & Birmingham | £30,000 to £45,000 + Benefits

Would you like to work for a well established dedicated Acoustic consultancy practice who work on some of the most prestigious projects in the UK and globally? From museums to office suites, conference centres in Scotland to towers in the UAE, theatres to power stations – there is a huge variety of work in multiple locations across around the world. Boasting some of the world's leading brands as clients, and working with leading architects – this role would represent the next step in your career for an Acoustic Engineer possessing between 3 and 7 years' experience in consultancy.

Senior Acoustic Consultant: | West Byfleet | up to £40,000

This is an excellent opportunity to join a well-established multi-disciplinary Environmental Consultancy and work alongside two very experienced and respected Acousticians. Due to increased workload they are seeking to recruit an Acoustician with around 4 or more years consulting experience. Working on a range of projects spanning Buildings, Planning & Environment – you will be involved in all aspects of consulting including design, fee proposals and modelling using CADNA. You will be degree qualified in Acoustics and a corporate member of the Institute of Acoustics (AMIOA considered).

Associate Environmental Acoustician | Paddington, London | to £60,000 + Bonus + Benefits

Due to growing workload, this leading Environmental Consultancy are seeking to recruit an experienced Acoustic Consultant to lead and develop their Noise Consultancy service from their London offices. With help and support from an established Acoustics team in Manchester (and from a team of Environmental Scientists in London) you will be delivering acoustic consultancy work and managing client relationships, managing projects from inception to completion and building a team of noise specialists in London. The workload is focused on Environmental Noise assessment – so candidates should have experience of managing EIAs, planning assessments for residential and mixed-use developments and construction noise assessment. This is a brilliant opportunity to lead and grow a team in London.
