

Recruitment Solutions: **Acoustics | Noise | Vibration**

Since 2004, MSA has provided a bespoke recruitment service to clients and candidates working in Acoustics, Noise and Vibration. As a niche recruiter in this sector, we have developed a comprehensive understanding of the industry enabling us to provide candidates with a wealth of information and a consultative approach to securing your next career move. We are currently recruiting for the positions listed below – and for a full list of our current vacancies, please visit: www.msacareers.co.uk/vacancies

Senior Acoustic Consultant | Manchester, London or Midlands | up to £45,000

Our client is a large multi-discipline global consulting firm who are looking to recruit an experienced acoustician who has demonstrable consultancy experience at Consultant / Senior level (or is ready to make the step to Senior). Your background should cover all areas of Acoustics – but extensive experience of delivering multiple and sometimes complex Environmental consultancy projects is key. In this role as main support to the Acoustics team leader, you will be expected to manage multiple projects to deadlines. The workload is incredibly varied and interesting, so no two days will be the same. You will get involved in all aspects of consultancy work (site meetings / report writing / fee proposals / noise modelling). Candidates will possess Corporate membership of the Institute of Acoustics (MIOA), a relevant degree linked to Acoustics along with a minimum 5 years of experience in acoustic consultancy. You will also possess a full UK driving licence. The role will be split 50/50 home / office working.

Junior Acoustic Consultant | Sheffield / Leeds area | up to £25,000 to £29,000

Excellent opportunity to join a small friendly Acoustics team in South Yorkshire. Work will involve undertaking a variety of acoustic assessments within the education, healthcare, construction, hospitality and retail sectors. Your role will involve travel and attending site visits, so a full driving licence and a flexible attitude to work and willingness to see the job through are key in this role. Candidates will hold a degree in Acoustics / Maths / Physics, a full driving licence and outstanding writing skills (essential). A strong work ethic and solid attitude are 100% required for this post. The role would suit a recent graduate who possesses these traits – or someone with prior working experience (possibly in a different field) who has completed (or is studying) the IOA Diploma.

Project Engineer (Underwater Acoustics) | Hampshire | £40,000 + Benefits

Our client is an international group of companies specialising in the design and manufacture of acoustic instrumentation, the conduct of large scale and complex acoustic recording projects and numerical acoustic modelling of underwater sound. They are looking for a **PhD qualified** Project Engineer to work as part of the UK team based in Hampshire.

Candidates will require a very strong academic background (to PhD level) in Physics / Maths / Acoustics / Engineering. A track record in the use of technical software will be important as the role will require the successful candidate to apply existing software skills and learn how to apply new bespoke software tools. You will be proficient with the complexities of coding and apply a logical approach to problem solving and manipulating large volumes of data in a variety of software applications.

The projects vary from seismic survey modelling, offshore wind and solar, to offshore floating rigs.

This is a technically demanding role operating at the cutting edge of science. As such, we are seeking applications from only PhD graduates.

There are excellent opportunities to progress for the right individual, as well as overseas travel.

Senior Acoustic Consultant (Environmental / Industrial) | Cheshire or Hampshire (hybrid) | £45,000 +

Our client is a specialist consultancy providing a thorough life cycle service to a range of clients within the building services industry. Due to having established an outstanding reputation within the industry, based on repeat and referral business, they are looking to expand their work force by appointing a Senior Consultant. Working with blue chip clients, the role will involve:

Acoustic design / specification - Peer review of consultants reports / data input - Detailed technical report writing - Mentoring junior members of the team - Glazing & ventilation design for large residential planning schemes - Delivery & activity noise impact assessments (supermarkets / large retail complexes / restaurants)

They are keen to hear from consultants with the following experience:

- Ideally 6+ years post-graduate experience (preferably in consultancy) - Experience of conducting industrial noise surveys in

line with BS4142 - A relevant degree and preferably IOA diploma - Experience of working within Refrigeration / Chillers / Air conditioning / Industrial fans / HVAC would be useful.

**To apply for these positions please e-mail your CV in complete confidence to: info@msacareers.co.uk
or call Jim to discuss 0121 421 2975**
