

Recruitment Solutions: **Acoustics | Noise | Vibration**

Since 2004, MSA has provided a bespoke recruitment service to clients and candidates working in Acoustics, Noise and Vibration. As a niche recruiter in this sector, we have developed a comprehensive understanding of the industry enabling us to provide candidates with a wealth of information and a consultative approach to securing your next career move. We are currently recruiting for the positions listed below – and for a full list of our current vacancies, please visit: www.msacareers.co.uk/vacancies

Acoustic Consultant (Graduate – Senior) | Kent / East London areas | up to £38,000 + Benefits

Our client is a multi-discipline environmental practice providing consultancy services to a range of clients across industry, construction and property development.

Due to expansion, they are seeking to recruit a talented consultant to join their Acoustics team in the South East of England. Supporting the Acoustics Principal, you will be involved in a range of land and construction based projects.

As well as a degree in Acoustics, you should ideally possess Technician membership of the IOA and a full UK driving licence is a must. Good writing skills and ideally some experience using Sound Level Meters will be required.

Exposure to noise modelling software such as SoundPLAN or CadnaA would be beneficial. The position is open for Graduates right through to Senior level candidates – the role can be tailored to suit your level of experience.

Acoustic Analyst | Central Scotland | up to £40,000 + Bonus up to 20%

Our client is at the forefront of renewable energy technologies operating across the globe. They are seeking to recruit an Acoustic Analyst to undertake early phase and simple acoustic assessments for wind, solar, energy storage and green hydrogen technologies.

Suitable applicants will be familiar with acoustic analysis methodologies and renewable energy markets, and have a good understanding of acoustic analysis best practice and current UK regulations.

This role will suit candidates who excel at Maths & Physics and have good software development / coding skills using tools such as Python. You will have a degree in Acoustics, Engineering, Physics, Maths (or a related discipline).

Associate Director (Technical Lead) | Manchester | up to £70,000 package

This role will focus on technical excellence and developing an established team of Acoustic consultants based in Manchester for a leading multi-discipline consulting firm. Your role will focus less on business development, but more on driving efficiencies, leading on complex projects (large infrastructure schemes, science technology parks, universities, care homes) and growing the existing team with BD input from other directors.

Technically, the role focuses predominantly on Environmental Noise projects, but given you will have around 12+ years experience in acoustic consultancy you will be expected to be comfortable handling projects across all aspects of acoustics.

**To apply for these positions please e-mail your CV in complete confidence to: info@msacareers.co.uk
