### **Junior Acoustic Consultant | St Neots, Cambridgeshire | up to £26,000**

As an independent Acoustic Consulting firm established for almost 20 years, my client has gained an enviable reputation in the market and punch well above their weight to work on a range of prestigious projects in London and across the UK. The workload is interesting and varied with good of Architectural & Building Acoustic design, and Environmental Noise & Vibration assessments. They have an opening for a bright and ambitious Acoustician to join their consultancy. Candidates will be expected to have a valid UK driving license, a Bachelor's degree in Acoustics or closely related subject, or the IOA postgraduate Diploma and be able to demonstrate excellent communication skills. Experience in using INSUL and/or CadnaA modelling software would be useful.

### **Associate Environmental Acoustician | Paddington, London | to £60,000 + Bonus + Benefits**

Due to growing workload, this leading Environmental Consultancy are seeking to recruit an experienced Acoustic Consultant to lead and develop their Noise Consultancy service from their London offices. With help and support from an established Acoustics team in Manchester (and from a team of Environmental Scientists in London) you will be delivering acoustic consultancy work and managing client relationships, managing projects from inception to completion and building a team of noise specialists in London. The workload is focused on Environmental Noise assessment – so candidates should have experience of managing EIAs, planning assessments for residential and mixed-use developments and construction noise assessment. This is a brilliant opportunity to lead and grow a team in London.

### **Associate (PA/VA Systems) | London, Cambridge or Birmingham | to £60,000 + Benefits**

Due to growing workload, our client is seeking to recruit an experienced Engineer with a background of working across the PA/VA industry. You will be part of a rapidly growing acoustics team with staff based throughout the UK. The location of this position will be flexible and some home working will be offered - although the flexibility to travel within the UK and abroad is required. The position involves developing acoustic models for PA/VA and other sound systems, loudspeaker layout designs and undertaking PA noise assessments, as well as technical design reports, design drawings and specifications. You will be participating in project design and coordination meetings, site inspections, performance testing and commissioning. The successful candidate should have excellent communication, writing and presentation skills combined with a strong understanding of sound systems design. In addition, in-depth knowledge and experience is required in EASE, Odeon or CATT modelling software, noise mapping software such as SoundPlan.

### **Acoustic Consultant | Essex or Norfolk | up to £32,000 + Benefits**

This role represents an excellent opportunity to work alongside an experienced Acoustics Principal to help develop the Acoustics business within this multi-disciplinary Environmental Consultancy. The role will involve modelling using CADNA, undertaking noise and vibration measurement surveys for mitigation of noise and vibration from civil engineering, construction, and industrial sites. You will also assist with calculation and assessment of buildings acoustics projects. Good writing and communication skills will be key to this role as you will prepare written reports and develop good relationships with colleagues from other teams within the business, as well as clients and external third parties.

### **Senior Environmental Noise Consultant | Bristol or Warwickshire | £35,000 to £45,000**

This is an outstanding opportunity to work within the Noise & Vibration team of a leading multi-disciplinary Environmental consultancy. They are seeking candidates with between 3 and 7 years' experience in Acoustic consultancy - with experience of working on highways schemes, construction projects and across industry/manufacturing. Candidates will ideally be at least Associate Members of the Institute of Acoustics (AMIOA), hold an Acoustics related degree (and/or IOA Diploma) and possess a full UK driving licence. A competitive salary will be accompanied by an excellent benefits package, along with CPD support and great prospects to progress in a growing team.
