

## JOB DESCRIPTION NOISE MONITORING TECHNICIAN/SURVEYOR

---

### **The Role**

We have an opportunity for a Noise Monitoring Technician/Surveyor to join our acoustics team.

You will be required to undertake a variety of background and operational noise surveys on sites throughout the UK. You will also be required to keep all monitoring equipment clean, maintained and ensure that all equipment is calibrated in accordance with the relevant standards.

The work requires a willingness to undertake lone working and a flexible approach to time keeping with some survey works being undertaken at night and at the weekend. Time off in lieu of out of hours working is currently operated.

The role is primarily site-based with travel throughout the UK. You will be provided with a company van.

The role requires the following qualifications and experience:

- A degree in Acoustics or equivalent with a 1-2 years' experience.
- Membership of the Institute of Acoustics (Tech IOA as a minimum).
- Undertaken (or willing to undertake) the IOA Certificate of Competence in Environmental Noise Measurement.
- Good attention to detail.
- Good note taking skills.
- Flexible approach to working hours.

### **Benefits**

We offer a competitive salary, good holiday entitlement, plus other benefits and a friendly working environment.
