

Noise Consultant

Belfast

Excellent Salary (commensurate with experience) + Benefits

Are you an experienced Noise Consultant looking for a new challenge...? **Do you** want the opportunity to work in a successful and expanding noise team on a range of development types from small scale buildings to large infrastructure projects such as roads and harbours...? **Would you** like the chance to work within an integrated environmental team within our Belfast Office with the opportunity to interface with and learn from other environmental disciplines...? **If so, we have the perfect role for you!**

About the Role

We are looking for a Noise Consultant to join our existing noise team as part of our successful Environmental Team in our Belfast office. The role involves conducting report writing, site surveys and noise monitoring and you will undertake project management and bid preparation as well as liaising with clients, Council Environmental Health Officers and Statutory Bodies. You will also be responsible for managing noise impact assessments from concept to completion on a range of project types and scales across NI and ROI. You will also manage one direct report.

About You

Ideally you will be an experienced Noise Consultant who has worked on a range of development types, with a degree in a relevant environmental discipline and a Member of Institute of Acoustics or working towards Membership. You will possess minimum 3 years' experience gained in a noise consultancy role, conducting site surveys, using noise monitoring equipment and contributing to bid and quotation preparation. We require proven analytical skills and excellent report writing ability too. You must also be able to communicate effectively within a team, with clients and with Statutory Bodies so the ability to write clearly and concisely is vital. Experience of noise surveys and noise impact assessments is essential along with good project management skills preferably managing projects from conception to completion. Working knowledge of MS Word and Excel and GIS (MapInfo or similar).

About Us
