

SANDY BROWN

Consultants in Acoustics, Noise & Vibration

About us:

Sandy Brown is a leading independent acoustic consultancy with a rich heritage supported by a contemporary approach.

Our world class reputation is based on excellence and continued innovation. This is achievable because we invest in people, nurture talent and potential, and help to develop knowledge and expertise.

What we offer:

A friendly and supportive work culture that recognizes the importance of a healthy work-life balance. We also offer:

- A competitive salary, bonus and benefits
- Private healthcare
- Flexible/hybrid working options
- Exposure to ground-breaking and prestigious projects
- Renowned in-house training and professional development support
- An unrivalled opportunity for career development.

For those who are ambitious, enthusiastic and passionate about acoustics, this is a career defining opportunity.

Who we are looking for:

While always open to exceptional talent, we are currently looking for the following:

Acoustic engineers (Birmingham & London).

Candidates will:

- Be ready to apply for AMIOA with the Institute of Acoustics (IoA)
- Hold an acoustics or physics degree, an engineering degree with acoustics coursework, or a related degree with the IoA Diploma
- Preferably have some building acoustics experience, such as through a year-in-industry.

Senior engineer (London).

Candidates will also:

- Possess a good technical understanding of acoustics with at least 3 years' building acoustics experience
- Have experience of technical and financial management of small to medium projects
- Be a Member of the Institute of Acoustics (MIOA).
