

Environment Agency

Technical Advisor - Air Quality and Noise

Location: Bristol
Salary £34,879

This is an exciting opportunity to become part of the Environment Agency team providing technical expertise and leadership on air dispersion and noise modelling. You will help us to deliver a cleaner, healthier environment to protect people and wildlife.

You will audit and interpret air and noise impact assessments: providing advice and training to colleagues across the organisation, developing software tools and carrying out complex modelling studies. You will work closely with other members of the team, providing technical direction and helping to support their development. You will work with colleagues across the organisation to support policy and research in air quality and noise. You'll also have the opportunity to get involved in incident response.

Experience/skills required

You will have

- Significant air quality and/or noise modelling experience gained through regulatory, consultancy or industry roles.
- A proven ability to analyse data and solve problems to make decisions.
- Excellent verbal and written communication skills and the ability to convey complex technical information in a clear and accessible way.
- Strong interpersonal and team-working skills and the ability to coach colleagues.
