

Penguin Recruitment is a specialist recruitment consultancy offering services to the Environmental and Engineering industries.

Graduate Acoustic Consultant – London - £23,000-25,000 per annum

Our client, a national engineering consultancy is seeking a talented Graduate Acoustic Consultant to join their team in London. You need to have a minimum of a BSc or BEng in Acoustics, excellent communication skills both written and verbal, and some knowledge of UK regulations surrounding building acoustics. This role will provide the successful candidate the chance to work on large scale property development, across both commercial and residential builds. Duties will include; undertaking sound insulation testing, data collation and writing reports. If selected, you will be on competitive starting salary and flexible benefits package.

Acoustic Engineer – London - £30,000-£33,000 per year

We currently have an excellent opportunity available for a candidate with proven expertise in the UK Environmental Acoustics field to join an established noise and vibration specialist in their London offices. Ideal applicants will have extensive consultancy expertise within the environmental Acoustics sector, with a focus on infrastructure and property developments. They will also hold a BSc or MSc in Acoustics or Noise and Vibration Control, and an IoA diploma, and Full or Associate IoA membership.

Building Acoustic Consultant – Guildford - Circa £35,000 per year

Our client is a medium sized specialist niche building acoustic company based near Guildford. They offer a friendly and professional service all around the UK and are looking for a Building Acoustic Consultant to join their team. The ideal candidate will have excellent technical skills and will be able to explain complicated reports in simpler terms to clients to help them understand what is required. You will be required to travel independently to different clients' sites around the country undertaking noise assessments and sound insulation testing. The starting salary for this role is flexible depending on your level of experience.

Graduate Acoustic Consultant – Bedfordshire - £24,000+ per annum

Niche specialist in noise and vibration require a fresh Graduate to work across both their consultancy and design arms of the business. Exciting project base includes; schools, hospitals and performance spaces.

Environmental Noise Specialist – Manchester - £32,000-37,000 per annum

A leader in the engineering and environmental design markets need an Environmental Noise Specialist to work from anywhere in the Manchester region. Extensive monitoring experience is required along with a deep understanding of EIA's.

Acoustic Sales Engineer – London and home counties - £40,000-45,000 per annum

We have an exciting opportunity for an Acoustic Sales Engineer with commercial experience to join an independent company that specialises in the design, manufacture and installation of noise and thermal control products. Working closely with the engineering division of the business, you will be; liaising between technical staff and clients at all stages of the client's projects, producing quotation, carrying out business development and achieving revenue targets. You will ideally have a degree in an Acoustics related field, up to date knowledge of noise control products such as louvres and enclosures, and a full driving license. Benefits include competitive salary, excellent career progression and a close knit working environment.
