

## Job Opportunity

We have an exciting opportunity to join our expanding team of Acoustic Consultants and are considering applications from Junior level up to experience acoustic consultants.

### The successful candidate should ideally have:

- ✓ Degree or post – graduate qualification in Acoustics or similar
- ✓ Professional membership at a minimum level of AMIOA
- ✓ Positive attitude and excellent verbal communication and report writing skills.
- ✓ Ability to manage time, resources, and projects effectively.
- ✓ Minimum of 1 – 2 years' experience as an Acoustic Consultant
- ✓ Full driving licence essential

### The Role

We are looking for someone with a passion for acoustics who is eager to progress their career within environmental and building acoustics. This position can be based from our Head Office in Leeds or from Home, anywhere in the UK. The successful candidate will be expected to carry out noise impact assessments and planning related noise assessments, undertake building acoustic design and testing work and conduct occupational noise risk assessments. The candidate will preferably have experience liaising with clients and carrying our consultancy projects from start to finish. Experience with noise modelling in SoundPlan is desirable.

Our remuneration package is competitive, and we are sure you will enjoy working in our friendly and driven team of acoustic consultants.
