

Acoustic Consultant

Are you looking for your next career step? Do you want the opportunity to work on a broad range of projects, utilising your acoustics knowledge to provide first class noise and vibration advice to our clients? This role will provide you with this opportunity whilst working within a market leading consultancy team.

About Our Acoustics Practice and Environment Advisory Group:

Our UK Acoustics practice specialises in resolving environmental noise and vibration issues, whilst also providing excellent building acoustic design, occupational acoustics and industrial noise control services. We collaborate with our clients and colleagues on projects in all our end markets, including aviation, energy, buildings, maritime, industry and urban development. We work either as part of a multidisciplinary team or direct to external clients in the UK and internationally.

Our Acoustics practice sits in our Environment Group, which has been providing environmental solutions for our clients for over 30 years in the UK. We offer a comprehensive range of environmental services to support all sizes and types of development and our acoustics team is integral to this. From high profile infrastructure projects such as Dogger Bank Offshore Wind Farms and Sizewell C Nuclear Power Station, to carbon management, climate resilience, locally driven habitat enhancement and wider biodiversity net gain projects. We combine market-leading technical excellence, across the range of environmental disciplines, with a clear understanding of clients' ambitions, needs and pressures.

Due to continued growth in a variety of markets including offshore wind, data centres and in the water sector, we have an opportunity for an Acoustic Consultant to join our expanding Acoustics team.

Job Role:

We are seeking an enthusiastic and talented person with excellent communication skills and technical ability in most aspects of noise and vibration. In this role, you will apply these skills across a variety of projects, undertaking noise and vibration surveys across the UK, predictive calculations and modelling, technical report writing, building acoustics design, environmental impact assessment, and providing mitigation advice.

This role might be right for you if you have:

- Bachelors degree in a relevant subject and/or the IOA Diploma in Acoustics and Noise Control
- Experience in a consultancy environment;

- Experience of noise monitoring surveys, environmental noise assessment, and planning guidance;
- Working knowledge of legislation and guidelines relevant to the acoustics sector;
- Experience in the use of noise modelling software and preferably AutoCAD;
- Commercial understanding, an interest in securing new business and confidence at the client-interface;
- Excellent written and verbal communication, organisational, analytical and time management skills;
- Good interpersonal skills; and
- Willingness to travel, including possibly to international destinations.

And if you are:

- Dependable, pro-active and self-motivated
- Flexible, conscientious and adaptive / innovative

What we can offer you:

Ambitious. Exciting. Lively. Collaborative. Dynamic. That's how our colleagues describe our company. Want to contribute to Enhancing Society with your expertise? Be part of an open network where you're connected with the brightest and smartest people and technologies? Join us!

You can look forward to growing your career in a dynamic workplace with development opportunities and support on your career path. We have flexible working models to ensure a balance of family and working life.

About HaskoningDHV:

Royal HaskoningDHV has been connecting people for 140 years. Together, through our expertise and passion, we have helped contribute to a better society and improved people's lives with work underpinned by our sustainable values and goals. We are an independent international engineering and project management consultancy leading the way in sustainable development and innovation.

Royal HaskoningDHV is an Equal Opportunities Employer. We have the clear goal of driving diversity and inclusion across all dimensions. Together, we are embarking on a journey where each and every one of us, individually and collectively, welcomes and celebrates individual differences. We recognise that embracing diversity unlocks innovation and creativity and fosters collaboration. We want our employees to reflect the diversity of our communities and the customers we serve.

Location: Peterborough, Brighton, London, Edinburgh, Exeter, Newcastle, Liverpool, Newcastle
