

**Consultant – Acoustics  
Full-Time, Permanent  
Brighton or Southampton**

**Overview**

RPS has a great opportunity for you to develop your expertise in one or more specialist areas of acoustics consultancy. We are looking for a Consultant to provide acoustics, noise and vibration consultancy advice to clients, related to new development and/or infrastructure and industrial processes requiring assessment under EIA or in support of new planning applications or providing design advice for buildings.

**The role**

Working with our highly knowledgeable team, you'll have an interesting and varied role that will enhance your skills and shape your career in acoustics. You'll liaise closely with clients, developing relationships to enhance business opportunities, preparing fee proposals and carrying out acoustics noise and vibration assessments.

Key aspects of the role include collating data, computer modelling, noise and vibration measurement, calculations and processing of results, interpretation of data, production of reports, drawings, figures and tables. Other tasks will see you: managing projects within the agreed budgets and delivering a product of suitable quality within the agreed timescales including: Invoicing; attending meetings, supporting Business Development; deputising when necessary for Seniors, and carrying out all work in accordance with the office systems for quality, environment and safety management.

**Your skills and experience**

Ideally you'll have been educated to degree level or equivalent within a relevant subject. There will be some travel involved so we'll need you to have full clean UK driving licence. You'll have a good level of technical proficiency across the main acoustics areas (noise and vibration assessment, noise and vibration monitoring and computer modelling techniques) and the ability to provide guidance and well-informed advice to Assistant Consultants. With a collaborative and consultative approach you'll be good at developing relationships. We'll need you to be numerically proficient and IT literate in mapping, acoustic modelling and, ideally, Autocad and have good analytical and problem-solving skills.

**What we offer you**

We will provide you with a flexible, friendly and creative environment to develop your skills and challenge yourself. We support our people to innovate, collaborate and build meaningful careers. Our network of people and knowledge will expand your horizons and give you access to a variety of interesting projects across the UK.

Our employees are rewarded with competitive salaries, opportunities to invest and many other benefits including: 24 days holiday + bank holidays, Option to purchase up to 5 extra days per year, Company pension scheme, Group Disability Scheme, Share Incentive Scheme, Life Assurance, Cycle to Work Scheme, Health Screening, Employee Assistance Programme, Professional Memberships and our brand new BenefitHub offering discounts, cash back offers and rewards
