

From helping shape entire cities to tackling the challenge of climate action, a career at Buro Happold presents the chance to make a difference. With a world class reputation, our work and our people have delivered positive change to clients, the environment, and communities alike. If you want to be part of something bigger, this is your chance.

Operating in 25 locations worldwide, with 54 partners and over 1,900 employees; for over 40 years we are a world-class global practice of engineers, consultants and advisers.

Working as a multi-disciplinary team, Buro Happold provides the full range of environmental services required on projects, drawing on our experience across the globe to provide expert advice and design, from concept through to project completion.

Based out of our London office on a part time basis, we are looking for an **Environmental Noise Consultant** with a degree in a relevant environmental discipline and a graduate member of the Institute of Acoustics, to provide expert advice from concept through to project completion on a range of development types. This role is on a fixed-term basis for 12 months.

Responsibilities Will Include:

Undertaking all works necessary to complete an environmental noise and vibration assessment for urban regeneration schemes. Assessments are often part of a multi-disciplinary environmental impact assessment, led by Buro Happold, and will involve working as part of the wider client design team with:

- Establishing baseline,
- Undertaking monitoring, modelling and prediction of impacts
- Promotion of mitigation measures at both construction and operational phases.

In Return:

We can offer an exposure to a broad range of interesting projects and of course the support and guidance to help you develop your career within Environmental Consultancy and Acoustics.
