

Environmental Monitoring Technician

Woking, Surrey

We currently have a large number of specialised noise, vibration, dust and emissions sensors deployed across the UK and Europe monitoring activities typically focused on activities such as demolition and construction. Our equipment provides a continuous and live stream of data to our web portal known as HT Cloud.

We now seek to expand this team through the appointment of an Environmental Monitoring Technician who will work alongside the Environmental Monitoring Team undertaking all associated activities required to fulfil on-site environmental monitoring.

You should be highly motivated, self-confident and adaptable with solution orientated approach. A full driving licence is desirable.

Successful applicants can expect a competitive basic salary and appropriate training where required. A company pool car and all required personal protective equipment shall be available where projects require. Please see full job description, linked below.
