

Recruitment Solutions: **Acoustics** | **Noise** | **Vibration**

Since 2004, MSA has provided a bespoke recruitment service to clients and candidates working in Acoustics, Noise and Vibration. As a niche recruiter in this sector, we have developed a comprehensive understanding of the industry enabling us to provide candidates with a wealth of information and a consultative approach to securing your next career move. We are currently recruiting for the positions listed below – and for a comprehensive list of our current vacancies, please visit: www.msacareers.co.uk/vacancies

Senior Consultant (Building Acoustics) | Location flexible (WFH) | up to £45,000 + Benefits

Our client is looking for an Acoustician who enjoys Building Acoustics design work. They employ a team of Testers and BREEAM assessors nationwide and are now looking for a skilled individual to support the Acoustics discipline lead. The company has a substantial foothold in the Education sector, so experience of detailed design of Acoustics for schools is essential. Also working on a range of residential and commercial schemes (offices to 50-storey apartments / prisons / hospitality), candidates will ideally have experience of using INSUL, Bastian and/or CADNA. You will have detailed knowledge of the construction sector and Building Acoustics design (curtain walls / slab edge design). The role can be 100% home based but candidates will need to reside near a major motorway network in England to enable them to attend occasional meetings with clients and other project stakeholders.

Junior Acoustic Consultant | London (Tower Hill) | up to £28,000 + Benefits

We have an outstanding opportunity to work for a multi-discipline firm of consulting engineers within their dedicated Acoustics team. Working alongside a small team of Acousticians in their London offices, you will have the opportunity to work on an array of brilliant projects including cinemas, hotels, universities, prisons and large scale mixed use developments. This opening would suit a Graduate who ideally will have had some exposure to Acoustics surveys work (such as a placement year from University) or who has gained 1 year in consultancy, with a keen interest in buildings and architectural acoustics. The role will encompass a healthy mix of work in the office, on site and from home. You will receive ongoing support and development to become a great all round consultant. Candidates must possess a degree in Acoustics (and ideally IOA Diploma), a full UK driving licence and ideally AMIOA status. The company offers an excellent flexible benefits scheme including pension, life assurance and flexible holiday entitlement.

Senior Building Acoustician (iconic projects) | Central London (50/50 home) | up to £50,000

This role presents a unique opportunity for you to join an award-winning organisation that creates industry-leading solutions on a global stage. You will get the opportunity to contribute to the success of some of the most creative and iconic projects in the UK and overseas. We are looking for a knowledgeable and enthusiastic Acoustics Consultant to join their Building Acoustics team. You will join an established team of acousticians who provide building acoustic design services to a wide variety of clients and industries including commercial, sports and entertainment, residential, industrial, and mixed-use developments. Demonstration of a range of the following skills and experience is preferable: 5 years' experience in engineering acoustics within buildings - Deep technical experience of architectural / building acoustics and noise control engineering - Ability to share complex technical ideas and solutions to all stakeholders - Excellent attention to detail - An Acoustics related qualification - Full membership with the Institute of Acoustics - A full UK driving licence

Graduate Acoustician | Sheffield / Derby | £24,000

A long established independent Acoustic Consultancy have an opening for a bright Graduate with a strong background / interest in Acoustics to be based at their offices near Sheffield. Working alongside a vastly experienced management team, you will have access to a wealth of knowledge to start your career in Acoustics. You will be working on a range of projects including schools, hospitals, residential developments – conducting building acoustic design and environmental noise surveys. You will also be trained to use a range of noise modelling software such as CadnaA, CATT, INSUL and Bastian. The role will be office based (free parking on site) so a full driving licence and own transport is essential. You will also travel around the UK to carry out noise assessments. Candidates must have a degree in a related subject (Acoustics / Physics / Mechanical Engineering).
