

Project Engineer

CDM Stravitec Ltd is part of CDM Group, an international organization specializing in the design, supply and installation of vibration isolation and sound insulation products and systems for buildings and industry. Using our thorough knowledge of noise and vibration isolation techniques combined with our extended knowledge of the characteristics of various resilient materials we offer custom made solutions.

To support our growth and expansion in the UK market we are looking for a dynamic and motivated Project Engineer to manage our on-site installations.

The position will involve managing projects on site and nurturing relations with Acoustical Consultants, Stability Engineers, Architects and Contractors. The fundamental associated tasks and duties will be:

- Attending design meetings with clients, architects & acoustic consultants
- Material take-off from client drawings
- On-site supervision, follow-up and installation management of the defined solutions
- Liaison with the installation team
- Optimisation of materials and labour
- Producing method statements and risk assessments –a working knowledge of on-site health and safety is essential
- Liaising with our factory and HQ in Belgium regarding manufacture, specification and quality
- Analysing technical project specifications to formulate and design the optimal technical CDM UK solution, with assistance of the responsible product managers and draftsmen
- Preparing sketches, drawings and specifications showing materials to be used, construction and finishing methods and other details
- Providing technical and commercial offers for the CDM solution
- Establish and maintain relationships with all customer types
- Delegate responsibilities to the support staff of the project, and adjust resources according to the general needs of the project
- Define and reach sales objectives with the CDM UK Director

Qualifications & skills:

- 5+ years minimum experience in engineering in construction
- A mandatory degree in Engineering with a Civil Engineering background
- Mandatory experience in understanding general building construction
- Experience in the domain of acoustics and/or vibrations is considered as a strong asset

- li.** Excellent problem-solving skills
- li.** Self-starter, highly motivated, creative, with an entrepreneurial flare
- li.** Excellent organization skills
- li.** Numerate, articulate with excellent written and oral communication skills
- li.** Mandatory practical on-site project experience
- li.** Computer literate with Autocad experience
- li.** Alignment with our company's core values: Creativity, Dynamism, Result Orientation, Competitiveness and People Focused

Location & Working Hours

- li.** Location: South – East
- li.** Working hours: 08:00 – 17:00 Monday to Friday (40 hours per week)
- li.** Working from Home/Site based
- li.** Holiday entitlement: 25 working days per year

Following an initial training period in the companies' Headquarters (Belgium), the successful candidate will be required to work on their own initiative, delivering quality work sometimes against very short deadlines. In return we offer a competitive salary package in a growing, dynamic and entrepreneurial company.
