

Principal Noise and Vibration Consultant

CONTACT

Based in the West Midlands

jobsinacoustics@gmail.com

About us:

We are a small, dynamic acoustics consultancy with a close-knit team of consultants and technicians operating nationally. We offer professional engineering advice and measurement services in acoustics, noise and vibration.

- Free and easily accessed parking on site
- Fruit, snacks and Lunch provided
- Company car
- Pension Scheme

We are seeking enthusiastic people to join our team based in the Midlands. You will be involved in a wide variety of work, including core elements of: building design, M&E acoustic design, noise modelling and a wide range of noise and vibration environmental impact assessments.

The Role: All candidates should have full driving licenses and be prepared to work both from our offices in the midlands and at sites throughout the UK.

Should have a minimum of 20 years professional engineering experience, have a minimum of a masters degree and preferably a PhD in acoustics be a Chartered Engineer and have a track record of leading the noise and vibration aspects of construction and industrial projects with a high degree of skill in problem solving for architectural, building and environmental acoustics and a track record of presenting in inquiries and acting as expert witness in their respective field. Demonstration of proficiency in quality management systems development and a visible history of acoustic research an advantage.

(circa £55k – £75k)

Remuneration: As well as a salary commensurate with experience you will receive: access to a pension scheme and a company car. We strongly encourage our team to continue their professional and academic development and would be prepared, for the right candidates, to support further study at postgraduate diploma, masters and doctoral levels.

We look forward to hearing from you
