

Do you echo our values?

At Sandy Brown, we are a world-class independent acoustic consultancy and leaders with an excellent reputation. We strive to be the best, so we need those driven to be the best acoustic consultants. We are currently looking for acousticians at engineer level to join our Birmingham office and at engineer, senior engineer and principal engineer levels to join our London office.

Minimum requirements for the acoustic engineer role:

- Hold a relevant acoustics degree, or an engineering degree coupled with the Institute of Acoustics (IoA) Diploma
- Be AMIOA, working toward membership with the Institute of Acoustics (IoA)
- Possess a good technical understanding of acoustics and relevant building acoustics experience.

Additional requirements for the senior engineer role:

- Have experience of technical and financial management of small to medium projects
- Be a Member of the Institute of Acoustics (MIOA).

For the principal engineer role:

- Have experience leading medium to large projects
- Be working toward CEng.

What we offer you:

- A competitive salary and benefits
- Remote and flexible working options
- A friendly and supportive environment
- The chance to work on ground-breaking projects
- The opportunity to develop your knowledge and experience.

If this sounds good, then email your CV and cover letter to Jason Swan at post@sandybrown.com
