

Senior Acoustic Consultant

Location: London, North Acton with some travel to sites

Contract: Full-time, permanent

Salary: £45-50k basic + benefits package

About us:

The role will work on the HS2 project. HS2 is the UK's new high speed rail network. It will be a catalyst for economic growth across Britain, freeing up space on the existing railways and connecting 8 out of the UK's 10 biggest cities with fast, reliable and frequent high speed services

The Skanska | Costain | STRABAG (SCS JV) is delivering the HS2 London Tunnels Contract. Scope of works includes twin-bored tunnels (TBM), Sprayed Concrete Lining (SCL) tunnels, shaft sinking, bridge demolition and reconstruction, services diversions, earthworks and the construction of site compounds.

About the role

The Senior Acoustic Consultant will advise the project on contractual and legal requirements regarding noise and vibration. Providing a key link between the SCS environmental team, consents team, and the construction team.

Key Responsibilities:

- Providing support and advise to the project team on all matters of noise and vibration
- Ensuring compliance to consents and Undertakings & Assurances
- Preparing Section 61 applications
- Noise modelling and predictions
- Noise and vibration monitoring and preparing reports and interpreting data
- Liaise with and attend meetings with Stakeholders including local authorities to discuss construction works, consents and monitoring.
- Develop technical reports related to BS4142:2014, NI/TRH, vibration risk etc.

Required qualifications, skills, behaviours and attributes

- Experience (training and education) relevant to managing noise and vibration on major construction projects;
- Good knowledge and practicable experience of the Section 61 process and how to comply with them;
- Experience of liaison with Stakeholders including statutory bodies such as local authorities;
- Experience of preparing, obtaining and complying with Section 61 consents; and
- Be an associate or full member of the Institute of Acoustics (or equivalent competent body)
- High degree of professionalism and strong communication skills required for regular regulator engagement

Demonstrates a passion for the Environment and Sustainability, driving innovation and an ability and desire to positively influence and develop those around them.
