

## **Senior Consultant – Acoustics**

**Full-time, Permanent**

**London, Brighton, Manchester or Southampton**

### **Overview**

RPS is looking for an experienced Acoustics Consultant to join us in this Senior position to provide acoustics, noise and vibration consultancy advice to clients, related to new development and/or infrastructure and industrial processes requiring assessment under EIA or in support of new planning applications or providing design advice for buildings. This will be a great opportunity for you to develop advanced expertise in one or more specialist areas of acoustics consultancy. By joining us, you will become part of a leading global multi-disciplinary consultancy specialising in all areas of the built and natural environment, shaping the future of our environmental, social and economic landscapes.

### **The Role**

Working with our highly knowledgeable team, you'll have an interesting and varied role that will enhance your skills and continue to develop and shape your career in acoustics. You'll liaise closely with clients, developing relationships to enhance business opportunities, preparing fee proposals and carrying out acoustics noise and vibration assessments.

Key aspects of the role include collating data, computer modelling, noise and vibration measurement, calculations and processing of results, interpretation of data, production of reports, drawings, figures and tables. Other tasks will see you: managing projects within the agreed budgets and delivering a product of suitable quality within the agreed timescales including: Invoicing; attending meetings, supporting Business Development; deputising when necessary for Principal colleagues, and providing technical reviews to a high standard.

### **Your skills and experience**

This role is the first line of team management so some experience of this would be advantageous. With a collaborative and consultative approach, you'll be good at developing relationships and be confident and decisive. Ideally, you'll have been educated to degree level or equivalent within a relevant subject. There will be some travel involved so we'll need you to have full clean UK driving licence. You'll have a good level of technical proficiency across the main acoustics areas (noise and vibration assessment, noise and vibration monitoring and computer modelling techniques) and the ability to provide guidance and well-informed advice colleagues. We'll need you to be numerically proficient and IT literate in mapping, acoustic modelling and, ideally, Autocad and have great analytical and problem-solving skills.

### **What we offer you**

We will provide you with a flexible, friendly and creative environment to develop your skills and challenge yourself. We support our people to innovate, collaborate and build meaningful careers. Our network of people and knowledge will expand your horizons and give you access to a variety of interesting projects across the UK.

Our employees are rewarded with competitive salaries, opportunities to invest and many other benefits including: 24 days holiday + bank holidays, Option to purchase up to 5 extra days per year, Company pension scheme, Group Disability Scheme, Share Incentive Scheme, Life Assurance, Cycle to Work Scheme, Health Screening, Employee Assistance Programme, Professional Memberships and our brand new BenefitHub offering discounts, cash back offers and rewards
