

Acoustic Consultant

Sharps Acoustics is looking for an acoustic consultant of at least 8 years' experience to join its small, dynamic, team. The successful candidate would maintain the high technical excellence of the company whilst broadening its capability. The consultant being sought would play a key role in shaping the Partnership's future direction and growth.

The company

Sharps Acoustics is a Limited Liability Partnership (LLP) of three consultants, all very experienced in environmental acoustics. Since its formation in 2008, the firm has provided consultancy advice on some of the largest development projects planned and developed in the UK. The principal development sectors in which Sharps Acoustics' consultants advise include infrastructure, energy generation, residential, commercial, and industrial. Typical work is that requiring noise or vibration impact assessments including those covered by EIA or noise nuisance Regulations. This work usually involves either that in support of planning applications or technical review for local planning authorities. Sharps Acoustics' current consultants are based in Oxfordshire and Suffolk. Information on the company can be found on our website: www.sharpsacoustics.com

The role

The successful candidate will be an experienced acoustic consultant and a Member of the Institute of Acoustics with a degree or post-graduate degree in acoustics or a related subject. The successful candidate must have the ability and experience to - undertake noise and vibration monitoring, analyse survey results, calculate noise emission levels including by computer modelling, assess likely noise or vibration impacts by reference to planning policy and technical guidance, and produce comprehensive but concise reports.

Sharps Acoustics is looking for a person who has the innate ability to work closely with clients, legal and planning professionals, and colleagues to deliver projects of the highest standard. They will be someone with the ability to manage a busy and time critical schedule of work involving multiple projects. The successful candidate must be up to date with current methods, legislation, and industry best practice. Excellent written and verbal communication skills are essential.

The company does not have a central office. Instead, consultants are expected to work from home, with site survey and other work undertaken nationwide. A full driving license is required.
