

Principal Acoustic Consultant

Following a significant increase in demand for our services on major infrastructure projects, we are actively seeking to recruit a Principal Acoustic Consultant with five to ten years' experience of work in the field of construction noise and vibration assessment, monitoring and management.

Successful applicants will play a key role in the provision of technical and advisory services across our major project involvements including: construction noise and vibration management; indoor/outdoor noise and vibration surveys; noise and vibration calculations and assessments; detailed acoustical design of mitigation measures and control strategies; stakeholder engagement; and compliance monitoring.

Candidates should be suitably qualified in acoustics or related subjects and should have relevant and demonstrable experience in contract management and the management of consents and acoustical matters on major construction projects.

Applications are invited from self-motivated individuals who have a strong work ethic and are prepared to maintain and contribute to our on-going achievements, and who possess good verbal and written communication skills. Candidates should be able to work on their own and as part of a project team.

Southdowns is an equal opportunities employer offering a comprehensive remuneration and benefits package and a commitment to CPD through our active training and mentoring schemes.

Please apply with a copy of your CV and covering message to Rick Methold at rhm@southdowns.eu.com
