

Acoustics, Noise and Vibration Specialists – UK Wide

Come power progress for our people, our business and our planet

Due to continuing success in our multi-sector and multidisciplinary projects we are seeking talented and motivated Acoustics, Noise and Vibration specialists to join our team within Resilient Environments International at Wood.

Wood is a world leading engineering and consultancy company across energy and the built environment. We have an extensive track record in delivering noise and vibration services directly to clients or as part of large, high profile and complex multi-disciplinary major infrastructure project teams.

This is an exciting time to join a fast paced and growing team. We have an extensive portfolio of projects worldwide meaning we can offer various career opportunities in the infrastructure and wider energy transition space.

We are looking to expand the team to enable continued success in this exciting market. We have opportunities within our acoustics team, working alongside other technical specialists, primarily within environmental management and sustainable infrastructure. We are seeking candidates with a variety of experience levels – to find out more, find the links in the trees
